# TechCamp Bravo

**July 6–17, 2026 • A Few Spots Still Open**

**You may have heard of ComputerCorps. You may not have heard of TechCamp.**

TechCamp is two weeks that kids ages 9 to 15 actually remember. Monday through Friday, 1:30 to 4:30 pm, July 6 through 17. Small group — never more than 16 kids.

## What Happens at TechCamp

A third of the time is instruction. A third is hands-on lab work in hardware and software. And a third is the stuff kids tell their friends about in September — games like **Rush Repair**, **Mouse Toss**, and **keyShuffle Board**, plus free time for personal tech projects like a presentation on their own passion topic.

One session the kids form a working hard drive with their own bodies. Another they arrange themselves to be the pixels on a monitor. They pass information packets to each other to become a live internet relay. It is the kind of learning that does not feel like learning until you realize you cannot stop talking about it.

## Graduation Dinner — Friday July 17 at 5:30 pm

---

Camp closes with a free family spaghetti dinner. Casual — come as you are. TechCamp Director Christy Ramsey recognizes each camper individually — their personal accomplishments, what they built, what they learned — and presents them with a certificate, a camp photo, a t-shirt, and a hat. ComputerCorps founder Ron Norton speaks about the mission, the history, and sends every camper off with a challenge: keep learning, and use your tech skills to help others. A slideshow of photos and video from the two weeks plays while everyone eats.

Then every camper walks out the door with their **own complete computer system — a laptop loaded with Windows 11 Pro and Microsoft Office, the same system we sell at our outlet store for \$350.** Some campers swap the laptop for a tower. Either way, it is theirs to keep.

Thirty hours. • A graduation dinner. • A computer to take home.

**Total cost: \$490**

### How to Register

---

TechCamp has been running in Carson City for 15 years. If you meant to register back in May, now is the time. If you are thinking of someone else — a neighbor, a relative, a family from church or your community group — please pass this along. July 6 is close and space is limited.
